DRIFTWOOD

LOG SET INSTALLATION GUIDE

Important

The placement of the logs is not arbitrary. If they are positioned incorrectly, the flames can be impinged and will not burn correctly. NOTE: The logs are fragile and should be handled gently. Ensure you have all the elements shown below.

Log #1

Log #4

Log #2

Log #5

Log #3

Rocks

Step 1

Follow instructions in your owners manual to install liners and burner media.

Step 2

Place **Log #1** in the back towards the back liner panel as shown with both dowels facing up.

Step 3

Using a dowel on **Log #1** position **Log #2** as shown.

Step 4

Using the remaining dowel on **Log #1** position **Log #3** across from **Log #2** as shown.

Step 5

At this stage you can distribute the numbered rocks in the pattern demonstrated above.

Step 6

Place **Log #4** at the front of the firebox touching **Log #3**.

Step 7

Place **Log #5** at the front of the firebox touching **Log #2**. Your log set is now complete.

Visit www.enviro.com/mobile/DriftwoodLSG.html or scan the provided QR code to watch an easy to follow step-by-step video guide on setting up your new Enviro Driftwood log set.
